CAREER CENTER AND STUDENT EMPLOYMENT

2023 Berklee Graduating Student Survey | Responses by Demographic Group

Students from different learning environments and with different identities and backgrounds reported varied levels of satisfaction with their experiences at Berklee. The table below shows satisfaction and recommendation ratings by learning environment, nationality, racial and/or ethnic identity, and gender identity.

Findings related to these groups include:

- Students who are **Hispanic or Latinx are most likely to recommend Berklee** to others compared to students with other racial and/or ethnic identities.
- Compared to other learning environments, **Berklee Online students reported the highest levels of satisfaction** with each question except for activities and events.
- When compared to students of other racial or ethnic identity groups, students who are **Indigenous American or Alaska Native reported among the highest satisfaction with their program of study (95%), but the lowest satisfaction with preparation for plans after graduation (59%).**

283 graduates responded to the open ended question, "Is there anything else you would like to add about your experience at Berklee that was not already asked in this survey?"

KEY FINDINGS

Graduates highlighted experiences they had with faculty.

"The professors and students at Berklee are the real value of this degree. Amazing peers and educators."

"There's nothing like being in a class with a teacher that has worked in the discipline."

"The professors are more likely to match your energy and effort, but this is a double edged sword because sometimes the professors really do not care about what happens in your education which is incredibly disappointing and discouraging as a student seeking motivation and mentorship from the world renowned faculty and staff."

"I really respect my instructors' experience, and I was very happy learning from them, but I felt that they didn't necessarily give a breakdown of how to do things and expected us to just figure it out because that's what it's like in the industry, but I feel like when we are in school to learn from them, they should be teaching us first and then showing us how to troubleshoot. I feel like we were learning to read before learning the alphabet and it made the whole process that much more taxing."

"The professors were TOP NOTCH and brought the curriculum to life -- they are to be commended for their commitment to providing excellent instruction backed by many years of experience at the highest levels of the music business. BRAVO."

Graduates shared suggestions for the current Berklee curriculum.

"I think Berklee would thrive with a more student designed curriculum because everybody always complains about learning music they don't want to learn about or performing songs they don't want with people they might not like. I'm not sure about the exact details but everyone I've talked to complains about the curriculum not being interesting and actually hurting their love of music."

"Teach the future not the past."

"They should make sure performance majors get priorities in Labs and ensembles to maybe 2 each instead of 1 because it is so hard to get classes later but we have to take like at least 10 labs or ensembles to graduate."

"I also believe there should be a requirement for topics such as the climate crisis and protest music to be talked about at least for a few minutes in class."

"For Hip-hop being the #1 genre there were barely any students in the program that had that as their main genre. I wish there was more representation of that genre."

"I wish we had a class or multiple classes just for them to teach us more studio etiquette at the start and basic things like how to wrap cables. The staff working the studios here at Berklee Valencia taught me just as much as the professors. So if these staff could teach classes I think the program would greatly benefit."

"I'd like to add that financial education that was provided at the end of the year was brief and could have been extended. I also think more information about the possibilities for income and a sustainable art career could be included with this (e.g. grant writing and sponsorship (e.g. the field))."

"I would love for Berklee to support more student initiated projects."

"It would be great if the [Berklee Online] live classes were mandatory to attend. I like the flexibility, but I think it would be better if the whole class attended."

"I wish online musical theater undergrad classes had been offered."

Graduates mentioned wanting more collaboration and networking opportunities at Berklee.

"I would be great if students could hear more of each other's work early on, so it becomes easier to team up and work on projects together."

"Wish there were more ways to connect with other students in classes like a group conversation thread not tied to individual assignments."

"I feel like the time in class should allow for more student interaction. There is a very diverse population in most classes yet these voices are almost never heard because we are almost always listening only to the professor and not each other."

"I would appreciate some online platform where I can reach out to students and connect with them regarding projects and collaborations."

"I wish there was a place online where all Berklee Alumni could communicate with each other and be able to work together on projects."

"Would love to have more artists come to Berklee - but we would need a larger venue than the BPC."

"More dance related connections in the career center!"

"There were a lot of great guests brought in which was exciting. I wanted more music people to come in and those in more than one area/field."

"Would be super handy to have an excel sheet accessible to all graduate students with name, photo, contact details, instruments played, other relevant skills (e.g. drum programming, mixing)."
